## About Us:

LetMeOrder.in is a start-up product by YG Corp. It is a self-ordering system where local stores or restaurants can register themselves and go online on a single platform allowing them to be discovered by their actual potential customers. It helps speeding up the ordering process inviting more customers, and also allows stores or restaurants to track their sales and analytics, providing them better insights about their sales.

## For Stores/Restaurants

LetMeOrder.in streamlines the ordering process, saving stores the time and efforts with increasing sales. With LetMeOrder.in, stores can effortlessly manage Orders, Sales, Products, and Analytics all in one place.

### Key Features and Benefits:

<b>Online Availability</b>	This product allows stores/restaurants to get their stores online on a single platform.
<b>Managing Sales</b>	It allows them to manage their orders and sales with flawless interface.
<b>Maintaining Records</b>	All the data of the sales are kept in records.
<b>Analytics</b>	The sales data provides the analytics of the business for continuous improvements.

### **Registration Process:**

For the registration, stores need to contact LetMeOrder.in through provided channels and provide the required details and documentations.

We will be providing the login credentials for the store's homepage.

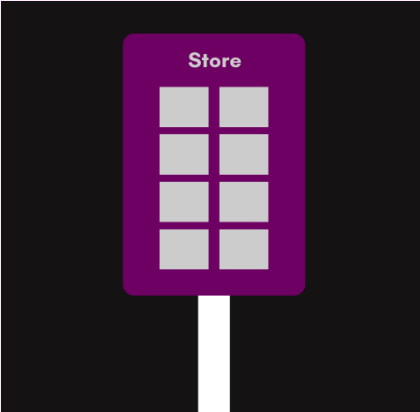

Once the payment setup of their stores is done, then only stores are required to make the payment for the subscription of the product.

\*stores can take the experience with a 1-month free trial of the product.

## Usage we Offer:

There are 3 implementations of the product for the stores/restaurants:

### Order-on-Screen

This allows stores/restaurants to place the screens over the counter desk or plant the kiosk and display the products to the user allowing them to select the items and place their order from the screen by adding it to cart and making the payment.

\*the cost and plantation of screen are taken care by the clients.

---

### Scan the QR

Stores can paste/distribute the QR codes here and there, which the customers can scan from their mobile devices and can access the menu of the store. Customer can add the items in the cart and place their order by paying for it.

---

### Cloud Store

Anyone willing to open cloud stores can bring inventory at their own places and can register on LetMeOrder.in with their home address and list the products on their store site and they can start selling from anywhere without the need of any physical store.

## Notes for Stores/Restaurants:

**Payment Setup:** After the registration, a Razor Pay account is required to be setup to generate Key ID and Secret Key for the payment gateway to receive the payment online directly in store's account.

**Delivery:** Stores can choose to provide the delivery facility at the time of registration. Delivery charges will be decided by the stores only.

Note that LetMeOrder.in doesn't facilitates the delivery process.

**Receiving Payment:** During registration, stores can choose to provide option for receiving payment in cash as well.

## For Users

LetMeOrder.in provides customers a convenience in the ordering process as it helps in eliminating the long waiting queues and it lets customers place orders in their favourite nearby shops from wherever they are which helps them avoid the waiting time of getting their order ready.

### Key Features and Benefits:

<b>Easy Access</b>	This platform allows the customers to place their order without bothering about the crowd.
<b>User-friendly Interface</b>	User Interface of LetMeOrder.in provides a seamless ordering experience.
<b>Convenience</b>	It helps users find their nearby stores without having to roam here and there.
<b>Searching Store</b>	Users can search their nearby stores by Location, Pin-code or Product.
<b>Saving Time</b>	Users can place orders from anywhere in their local area stores and can readily receive it when they reach at store.

## Notes for Customers:

**Receipt:** Customers are requested to save the receipt or keep a screenshot or picture of the receipt after placing the order to not miss their order number.

**No-Cancellation Policy:** Once the payment is made, orders can't be cancelled from the platform.
